Professional Summary

Experienced Lead Frontend Developer with 12+ years of expertise delivering high-performance, scalable enterprise and SaaS web applications using Angular (AngularJS through Angular 17+). Proven success as both a Technical Lead and Hands-on Individual Contributor, **designing, developing, and maintaining reusable Angular applications**, driving performance optimization, scalability, maintainability, and code quality.
Strong hands-on experience with Angular, TypeScript, JavaScript, RxJS, NgRx, HTML5, CSS3, Node.js, Express.js, MongoDB, and React.js, with deep expertise in **UI/UX implementation, reusable component architecture,** API integration, reactive programming, and modern UI development. Extensive experience working in enterprise and regulated domains including Banking, Insurance, Oil & Gas, and Telecommunications, collaborating with cross-functional stakeholders in Agile environments to deliver **high-performance, well-tested, and user-centric frontend solutions** with measurable business impact.

Technical Skills

- **Frontend**: Angular (AngularJS – Angular 17+), TypeScript, JavaScript (ES6), RxJS-based state management patterns, Angular Material, HTML5, CSS3, Flexbox, Responsive Design, Micro Frontend Architecture, Performance Optimization, Accessibility (WCAG), React.js
- **Backend**: Node.js, Express.js, RESTful API Design & Integration, Authentication & Authorization (JWT, Role-based Access), Error Handling, Performance Optimization
- **Databases**: MongoDB, ODM/ORM: Mongoose
- **Testing & Quality**: Unit Testing (Jasmine, Karma), E2E Testing: Cypress / Playwright (basic), Code Reviews, Static Code Analysis
- **DevOps & Tools:** GitHub, Jenkins, JIRA, Postman, CI/CD Pipelines, containerization (Docker, Kubernetes), AWS (basic exposure, deployment understanding)
- **Methodologies**: Agile (Scrum), Product-driven Development, Remote & Cross-functional Collaboration
- **Other**: Angular Architecture Design, Reusable Component Libraries, Code Quality & Reviews

Work Experience

Capgemini Technology Services India Limited, Pune, INDIA — Jun 2022 – Oct 2025

Lead Frontend Developer

Client: Baker Hughes | **Project:** CHOREOGRAPH – Job Planner (Oil and Gas domain)

• **Led development of a large-scale Angular 17 enterprise application** supporting mission-critical wireline job planning operations.
• Designed modular, scalable frontend architecture with reusable component libraries and optimized state management using RxJS.
• Established Angular coding standards, folder structures, performance benchmarks, and code quality practices across the team.
• Improved application rendering performance and workflow efficiency, **resulting in 40% operational productivity gain.**
• Led architectural decision-making, sprint planning, and technical roadmap discussions with client architects and product owners.

• Mentored and upskilled developers on Angular best practices, reactive programming, and enterprise UI patterns.

Tech Stack: Angular v17, RxJS, Node.js, Express.js, MongoDB, Unit Testing, and Infragistics UI library.

Synechron Technologies Private Limited, Pune, INDIA — Mar 2020 – Jun 2022

Lead Frontend Developer

Client: HSBC | **Project:** PGDE - Product Governance Data Engine (Banking & Financial Services domain)

• **Architected secure, enterprise-grade Angular applications** aligned with HSBC global UI and compliance standards.
• Implemented role-based access control (RBAC), secure API integrations, and audit-ready UI workflows for regulated banking systems.
• Collaborated with compliance, security, and backend teams to ensure adherence to financial governance and data protection policies.
• Contributed to architectural reviews, estimation strategy, and technical risk assessments in Agile delivery cycles.

Tech Stack: Angular v11, NgRx, Node.js, Express.js, MongoDB, HTML5, CSS3, Unit Testing and Typescript.

Persistent Systems Limited, Pune, INDIA — Jul 2017 – Mar 2020

Frontend Team Lead

Client: IBM | **Project:** Watson Campaign Automation (Telecommunications domain)

• **Led frontend architecture and UI module design for SMPP-Adapter** within IBM Watson Campaign Automation.
• Designed scalable Angular component architecture enabling seamless telco and aggregator integration.
• Directed UI code reviews, sprint task allocation, and delivery governance.
• **Contributed to 30% business profitability improvement through enhanced campaign efficiency**.

Tech Stack: Angular v8, RxJS, HTML5, CSS3, JavaScript, Typescript, and Web API Integration.

Wipro Limited, Bangalore, INDIA — Sep 2016 – Jul 2017

Senior Project Engineer (Frontend Development)

Client: US Bank | **Project:** KYC – Know Your Customer (Banking, Financial Services, and Insurance domain)

- Designed and developed frontend modules for **KYC onboarding systems**.
- Reduced customer onboarding and verification time by **25%**.
- Contributed to compliance-driven, security-focused UI solutions.

Tech Stack: Angular v4, Unit Testing (Jasmine and Karma), HTML, CSS3, JavaScript, Web API Integration.

Sysnocri Private Limited, Ahmedabad, INDIA — Jun 2013 – Apr 2016

Software Engineer

Started as a junior ASP.NET developer and gradually transitioned into frontend-focused development. Took ownership of daily UI development activities and delivered multiple client-facing web applications appreciated by customers.

Education

Bachelor of Technology, Computer Science from **Ganpat University**, Gujarat

Certifications & Courses

- **Agile Software Development**
